PREFACE AND ACKNOWLEDGEMENTS

This book is the commercial publication of my dissertation, publicly defended on January 14, 2014. The completion of this thesis would not have been possible without the help and support of many colleagues, friends, family, the Department of Economic Law of Ghent University and the Research Foundation – Flanders (FWO).

First of all, I am very grateful to FWO for giving me the material opportunity to write this dissertation and the Department of Economic Law of Ghent University for offering a stimulating research environment.

I would also like to thank my supervisor, Prof. Michel Tison, for giving me the opportunity to start working on this dissertation, the interesting discussions we had and for allowing me total freedom to pursue my ideas over the four years I worked on this dissertation.

I am most grateful to Prof. P. Davies, Prof. X. Dieux, Prof. G. Ferrarini, Prof. A. Prüm, Prof. H. De Wulf, Prof. M. Kruithof and Prof. E. Wymeersch for being part of my doctoral jury and my follow-up committee, in which M. Kruithof, Prof. E. Wymeersch and Prof. G. Ferrarini took part and which provided me with highly appreciated guidance and comments. I especially owe thanks to Prof. E. Wymeersch for his many interesting comments and remarks during the discussions we had and which improved the research significantly.

I would also like to thank my colleagues of the Department of Economic Law with whom I very much enjoyed working in a pleasant atmosphere and with whom I shared many lunches and work-(un)related discussions.

Finally, I am extremely grateful to the persons that are closest – my parents, family and friends – for their unconditional support and providing welcome and necessary distractions during the writing of this dissertation. A very special thanks goes to Glenn for his endless love and support, making it all worthwhile.
